(a) House completions data series are based on the number of new dwellings connected by ESB Networks to the electricity supply and may not accord precisely with local authority boundaries.

(b) Due to circumstances beyond the Department's control it has not been possible to obtain a separate set of figures for the first 6 months of 2005.

(c) These data excludes conversions of buildings into residential units, which are estimated to total 400 each year since 1992.
